

This evening I watched the documnetary
OutFOXed - a video documentary on FOX and
Rupert Murdoch. The information in this film is
very disturbing to me as an American.

The documentary was not an opinion piece of how
the FOX network operates without any eveidence.
The film showed actual footage from FOX
broadcasts and memos verifying the manipulation
of information for the benefit of one political party.
It is clear that the "reporting" is not "fair and
balanced" journalism. Study after study shows that
this network does not report the "news". What
they are reporting is propaganda - not news.

I have no problem with the broadcast of political
opinions and the promotion of a candidate for
office, but this should be done in political ads - NOT
in a "news" broadcast.

The broadcast of FOX news is NOT fair and
balanced. Studies show that the information given
on FOX News is misleading and that Republicans far
outnumber the Democratic guests on FOX News.

As an American I want an FCC that enforces a
policy to ensure I get truthful information from the
media. Please make honest journalism available to
me so I can participate in our democracy. Biased
broadcasts like FOX News are destructive in a
democracy. Men and women in our armed forces
are dying every day to defend democracy and
bring democracy to others around the world.
Please do your part to ensure we have a diversity
of information available to the American public to
ensure our freedom and safety.

One sided news coverage is not news, it's
proaganda and very dangerous. Look to Iraq,
China, Cuba and other countries where the media
is controlled by one party. Please do something to
unlock the hold on American media that FOX and
other large media conglomerates have on our
media outlets. Time is short.

Thank You!

Ed Brown
